(If needed, at the top, choose **Open with Google Docs**.) Go to **File**, **Make a Copy**. In the window that pops up, under **Folder**, hit the **back arrow** until you get to **My Drive**, then choose **Select**, and then **OK**. Or **Download** as a Word file. You should be in your copy now. Double Click a **box**. **Edit** the information. Click **Save and Close**. Either delete or choose another box depending on the number of kittens you need labels for. When you are done editing, Click the **Printer icon** on the icon bar and **follow the prompts** to print.
