EFFECTIVE IMMEDIATELY – RE: MICROCHIPS / PAIN MEDS

MICROCHIPS

Microchips are not to be done at time of alter. Although we provide the microchip, we are charged for insertion.

PAIN MEDS

Pain meds are not to be administered during time of alter. Kittens should not need them. If a cat has a more extensive surgery and the veterinarian feels pain meds are needed, you must contact Carrie and get approval.

If a foster opts to have microchip inserted at time of alter or pain meds administered, it will be at the cost of the foster and not the responsibility of Saving One Life.

Please contact me with any questions.

A handwritten signature in blue ink, appearing to read "Carrie Neidorf", with a long horizontal stroke extending to the right.
