ANESTHESIA / SEDATION MEDICAL RELEASE FORM

Client Name: <u>Saving One Life</u>	Date:
Pet Name:	Client Chart #:
Your Pet's Procedure(s): <u>Alter</u>	

Please initial on the agree or decline line to indicate if you would or would not like any of the following options for your pet.

PRE-ANESTHETIC BLOODWORK: \$95.00

- Important at any age to identify potential risk factors prior to anesthetic/sedated procedures.
CLIENT AGREES _____ **CLIENT DECLINES** em

IV CATHETER: \$35

- IV Catheters are used to administer medication directly to your pet's bloodstream. They are an easy access portal especially in emergency cases and prevent needle stick injuries.
CLIENT AGREES _____ **CLIENT DECLINES** em

IV FLUIDS: \$100

- It is recommended to use IV fluids during anesthetic/sedative procedures as they aid in keeping your pet hydrated and maintain their blood pressure.
CLIENT AGREES _____ **CLIENT DECLINES** em

SCROTAL ABLATION (MALE DOGS ONLY): \$220.00

- You know your pet best, if you know that your pet has an excessive amount of energy and loves to run/jump or play rough please consider this option for your pet. Neuters are a routine procedure, but every now and then we do have some patients return to us because their extreme energy led to a swollen scrotum. The procedure involves the complete removal of the testicles along with the scrotum.
- If you elect to decline the Scrotal Ablation you understand that complications may arise including but not limited to scrotal swelling, hemorrhage, bruising, and scrotal hematoma. These complications may result in the need for surgical repair with ranging cost of \$600 to \$1000.
CLIENT AGREES _____ **CLIENT DECLINES** em

PROTECTIVE COLLARS

- Collars are very helpful in preventing the patient from chewing or licking at the incision site during their recovery. Chewing or licking at the incision can cause damage to the tissue around the site and may cause bleeding or removal of the sutures which can be a major complication should the internal organs be exposed. Please note there will be additional charges for any additional surgical care of post-op complications.

SOFT COLLAR (CATS ONLY): \$13.00

CLIENT AGREES _____ **CLIENT DECLINES** em

E-COLLAR: \$11.00 - \$16.00

CLIENT AGREES _____ **CLIENT DECLINES** em

NO-BITE COLLAR: \$27.00

CLIENT AGREES _____ **CLIENT DECLINES** em

The client understands that all fees are to be paid the day that services are performed at the time their pet is discharged from our clinic. em

Surgical anesthetic/sedated procedure risks include, but are not limited to, infection at the incision site, unexpected blood loss, and any complications leading up to and including death. The client understands the potential risk(s) that may occur with anesthesia/sedation for surgical procedures. The client has been encouraged to discuss any concerns they may have about those risks with the veterinarian before the procedure(s) is initiated.
